ANNUAL REVIEW · 2026

The calm operating system.

How local businesses in Norway ran bookings, marketing and support on one shared brain — and what we are building next.

CONTENTS

Inside this review

01 A letter from the founders p. 03

02 The year in numbers p. 04

03 Pilot — one brain, three modes p. 05

04 Bookings that feel calm p. 07

05 Customer stories p. 08

06 Milestones p. 09

07 Open source p. 10

08 What we value p. 11

01 — LETTER

Software should get quieter as it gets smarter.

This year we stopped building features and started removing steps. A salon owner should not need to know what a webhook is to get a reminder sent. A marketing lead should not need five tabs to publish one post.

Pilot now handles the busywork in the background and asks for approval inline, in plain words. The result: fewer screens, fewer notifications, and more time with the people who actually walk through the door.

> “The best compliment we got all year was a customer saying they forgot we were there.”
>
> — THE FOUNDERS, OSLO

Small teams, big quiet wins.

1.2M

bookings handled end-to-end

99.98%

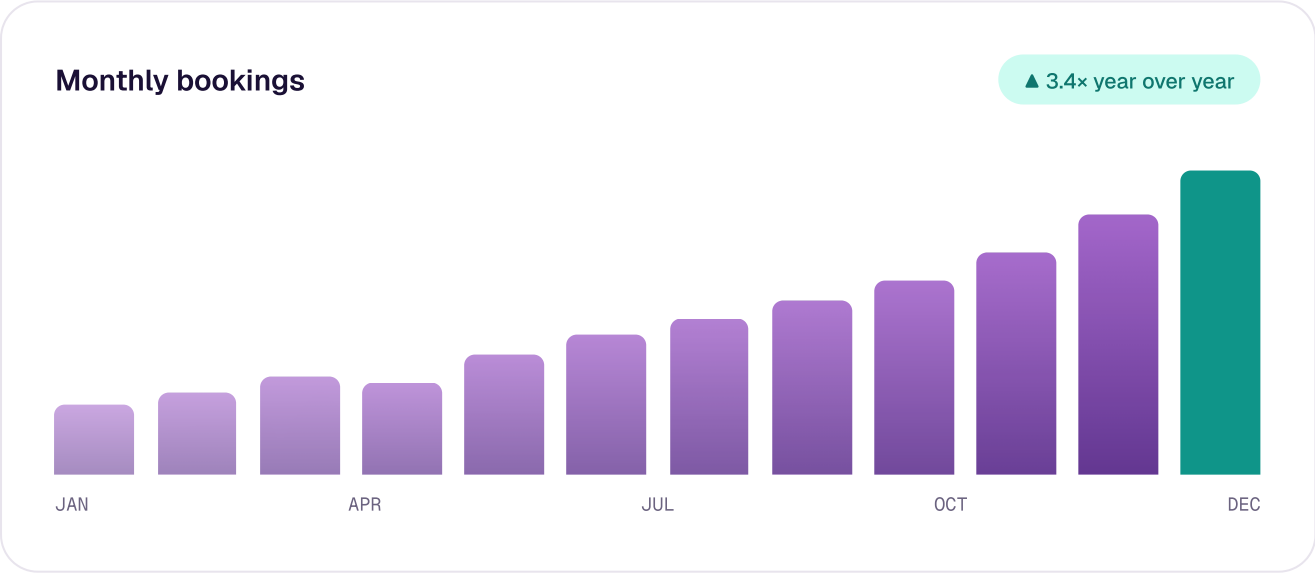

platform uptime across both regions

38k

posts published by Pilot, approved inline

−41%

fewer no-shows with smart reminders

03

Pilot.

One shared brain with three modes — Pilot, Autopilot and Support — so every surface of the business speaks with the same voice.

Three modes, one memory.

Pilot

You ask, it drafts. Every action waits for an approve / decline card in the chat.

Autopilot

Routine work runs on its own: reminders, follow-ups, weekly posts. You see a calm digest.

Support

Answers customers on web, SMS and phone with the same knowledge your staff uses.

A calendar that breathes.

09:00 · Haircut · Ingrid

10:30 · Colour · Maja

12:00 · Lunch

13:15 · Beard trim · Ola

14:00 · Kids cut · Emil

Day, week and month views were rebuilt around one idea: show less, but always the right thing. Closed days fade back, breaks are soft, and moving a booking is a single drag.

05 — CUSTOMER STORIES

Built with the people who use it.

Cool Kids

CHILDREN'S HAIR SALON CHAIN

"Moved every customer and appointment across in one evening — nobody noticed the switch."

Brandmark

BRAND STUDIO

"Launched a fully token-driven site; the same components, their own warm identity."

DMF

INDUSTRY FORUM

"Publishes reports as flipbooks members actually read on their phones."

The year, month by month.

MAR

Pilot opens to every workspace

MAY

Desktop app ships for macOS

JUN

Mobile 1.0 lands on iOS

SEP

Bookings round H: the calm calendar

OCT

Warm standby in Oslo — zero-touch failover

DEC

NextMedal flipbook component, open source

07 — OPEN SOURCE

Shared in the open.

NextMedal

NEXT.JS + SANITY STARTER

Meda

DESIGN SYSTEM & TOKENS

Pilot CLI

AGENT TOOLING

Arena

MODEL PLAYGROUND

Everything a customer site is built from is available to everyone. Brands re-skin it with tokens, not forks.

08 — VALUES

What we hold on to.

01

Plain words

If a salon owner would not say it, neither do we.

02

Calm by default

Fewer pings. Digests over alarms.

03

Ask, then act

Approvals live inline, never on a separate page.

04

Own the stack

Our infrastructure, in Norway, with a warm standby.

Thank you.
